🧠 Career 1: Cybersecurity Analyst

🟢 Beginner (2 tasks)

1. **Understand Basic Networking**
    a. Learn what IP address, DNS, HTTP/HTTPS are
    b. Watch 2–3 beginner videos + write notes
    c. Output: 1-page summary in your own words
2. **Install Kali Linux (or use VM)**
    a. Install VirtualBox + Kali Linux
    b. Learn basic terminal commands (ls, cd, mkdir)
    c. Output: Screenshot + list of 10 commands

🟢 Intermediate (4 tasks)

3. **Scan Your Own Network**
    a. Use Nmap to scan devices on your WiFi
    b. Understand open ports
    c. Output: Scan report + explanation
4. **Password Cracking Basics**
    a. Learn hashing (MD5, SHA)
    b. Use tools like John the Ripper
    c. Output: Crack a sample password
5. **Learn About Common Attacks**
    a. SQL Injection, Phishing, XSS
    b. Make short notes + examples
    c. Output: 3 attack explanations
6. **Try a CTF Challenge**
    a. Use platforms like TryHackMe
    b. Complete 1 beginner room
    c. Output: What you learned

Hard (3 tasks)

7. **Build a Basic Keylogger (Educational)**
    a. Python-based keylogger
    b. Understand how it works
    c. Output: Code + explanation
8. **Create a Vulnerable Web App**
    a. Use DVWA (Damn Vulnerable Web App)
    b. Test SQL injection on it
    c. Output: Demo + findings
9. **Write a Security Report**
    a. Simulate a real audit
    b. Include risks + fixes
    c. Output: PDF report

Career 2: Software Developer

Beginner

1. Learn variables, loops, functions in Python
2. Build a simple calculator (CLI)

Intermediate

3. Build a To-Do App (basic UI)
4. Learn Git + push project to GitHub
5. Build a REST API (Node.js or Flask)
6. Debug a broken codebase (intentionally buggy project)

Hard

7. Full-stack project (login system + database)
8. Deploy app on Vercel
9. Optimize performance (reduce load time)

🎨 Career 3: 3D Designer / Product Designer

🟢 Beginner

1. Learn Blender basics (move, scale, rotate)
2. Create a simple object (cup or phone stand)

🟡 Intermediate

3. Design a functional product (phone holder)
4. Learn texturing + lighting
5. Export for 3D printing
6. Recreate a real-world object

🔴 Hard

7. Design a product + print prototype
8. Make a product animation
9. Create portfolio-ready render

📊 Career 4: Data Analyst

🟢 Beginner

1. Learn Excel basics (formulas, charts)
2. Clean a small dataset

🟡 Intermediate

3. Analyze sales dataset
4. Learn SQL basics

5. Create dashboard (Power BI / Tableau)
6. Use Python (pandas)

Hard

7. Real-world dataset analysis
8. Predict trends (basic ML)
9. Present insights like a report

Career 5: UI/UX Designer

Beginner

1. **Understand UI vs UX**
    a. Learn difference between UI and UX
    b. Study 3 popular apps (like Instagram, WhatsApp)
    c. Output: Write what makes them easy to use
2. **Learn Figma Basics**
    a. Frames, components, text, colors
    b. Recreate a simple login screen
    c. Output: Screenshot of design

Intermediate

3. **Redesign a Bad App**
    a. Pick a poorly designed app
    b. Improve layout and usability
    c. Output: Before vs After
4. **Create Wireframes**
    a. Design wireframe for an app idea
    b. Focus on user flow
    c. Output: 5–6 screens
5. **Learn UX Principles**

    a. Learn hierarchy, spacing, contrast
    b. Apply to your design
    c. Output: Improved design
6. **Prototype in Figma**
    a. Add clickable interactions
    b. Simulate app flow
    c. Output: Interactive prototype

Hard

7. **Complete Case Study**
    a. Problem → Research → Solution
    b. Output: Portfolio-ready case study
8. **User Testing**
    a. Get 3–5 users to test design
    b. Record feedback
    c. Output: Improvements made
9. **Design System**
    a. Colors, fonts, components
    b. Output: Reusable UI kit

Career 6: AI / ML Engineer

Beginner

1. **Learn Python Basics for AI**
    a. Focus on numpy, loops, functions
    b. Output: Small programs
2. **Understand What AI Actually Is**
    a. Supervised vs Unsupervised
    b. Output: Notes with examples

Intermediate

3. **Use Pre-trained Models**
    a. Use ChatGPT API or image classifier
    b. Output: Small app using API
4. **Learn Pandas & Data Handling**
    a. Load and clean dataset
    b. Output: Clean dataset
5. **Train Simple Model**
    a. Linear regression or classification
    b. Output: Prediction result
6. **Evaluate Model**
    a. Accuracy, precision
    b. Output: Performance report

Hard

7. **Build AI Project**
    a. Example: Spam classifier
    b. Output: Working model
8. **Deploy Model**
    a. Use Flask + hosting
    b. Output: Live project
9. **Optimize Model**
    a. Improve accuracy
    b. Output: Comparison results

Career 7: Entrepreneur / Startup Builder

Beginner

1. **Identify 5 Problems Around You**
    a. School, students, daily life
    b. Output: Problem list
2. **Study 3 Startups**

    a. What problem they solve
    b. Output: Analysis

Intermediate

3. **Validate One Idea**
    a. Ask 10 people
    b. Output: Feedback summary
4. **Create Basic MVP**
    a. No-code or simple prototype
    b. Output: Demo
5. **Landing Page**
    a. Explain product
    b. Output: Website
6. **Pricing Strategy**
    a. Decide how you'll earn
    b. Output: Pricing model

Hard

7. **Launch to Real Users**
    a. Get first 10 users
    b. Output: Feedback
8. **Improve Based on Data**
    a. Track usage
    b. Output: Changes made
9. **Pitch Deck**
    a. Problem, solution, market
    b. Output: Presentation

📢 Career 8: Digital Marketer

Beginner

1. **Understand Marketing Basics**
    a. SEO, Ads, Content
    b. Output: Notes
2. **Create Social Media Page**
    a. Pick niche
    b. Output: Profile setup

Intermediate

3. **Content Strategy**
    a. Plan 7 days content
    b. Output: Content calendar
4. **Run Basic Ads (Simulation if no money)**
    a. Learn targeting
    b. Output: Campaign plan
5. **SEO Basics**
    a. Keywords, ranking
    b. Output: Keyword list
6. **Analytics**
    a. Track engagement
    b. Output: Report

Hard

7. **Grow Page to 500+ Followers**
    a. Organic growth
    b. Output: Stats
8. **Run Real Campaign**
    a. Small budget
    b. Output: ROI analysis
9. **Client Project**

    a. Manage someone's page
    b. Output: Results

🎥 Career 9: Content Creator (YouTube / Instagram)

🟢 Beginner

1. **Pick a Niche**
    a. Education, tech, lifestyle
    b. Output: Final niche
2. **Create 3 Short Videos**
    a. Focus on clarity
    b. Output: Published videos

🟡 Intermediate

3. **Learn Editing**
    a. Cuts, transitions
    b. Output: Edited video
4. **Study Algorithm Basics**
    a. Watch time, retention
    b. Output: Notes
5. **Thumbnail + Title Optimization**
    a. Improve CTR
    b. Output: Before/After
6. **Consistency Plan**
    a. 7-day schedule
    b. Output: Posting plan

🔴 Hard

7. **Reach First 1K Followers**
    a. Organic growth
    b. Output: Analytics

8. **Monetization Plan**
    a. Ads, affiliate
    b. Output: Strategy
9. **Build Personal Brand**
    a. Unique style
    b. Output: Profile identity

🛡️ Career 10: Ethical Hacker (Advanced Cybersecurity Path)

🟢 Beginner

1. **Understand Legal Boundaries**
    a. What is ethical vs illegal hacking
    b. Output: Written summary
2. **Set Up Lab Environment**
    a. Kali + DVWA + Metasploitable
    b. Output: Working setup

🟢 Intermediate

3. **Exploit Basic Vulnerabilities**
    a. SQL Injection, XSS
    b. Output: Exploit demo
4. **Learn Burp Suite**
    a. Intercept requests
    b. Output: Captured request analysis
5. **Directory Bruteforcing**
    a. Use Gobuster
    b. Output: Found directories
6. **Privilege Escalation Basics**
    a. Learn common techniques
    b. Output: Notes + example

Hard

7. **Complete 3 CTF Challenges**
    a. Medium difficulty
    b. Output: Writeups
8. **Bug Bounty Simulation**
    a. Find bug in test site
    b. Output: Report
9. **Automate Recon Script**
    a. Python-based tool
    b. Output: Script + results

Career 11: Product Manager

Beginner

1. **Understand What PM Does**
    a. Role, responsibilities
    b. Output: Summary
2. **Analyze a Product**
    a. Example: WhatsApp
    b. Output: Features breakdown

Intermediate

3. **Write Product Requirement Doc (PRD)**
    a. Define feature
    b. Output: PRD
4. **User Persona Creation**
    a. Define target users
    b. Output: Persona sheet
5. **Feature Prioritization**
    a. Use RICE or MoSCoW
    b. Output: Prioritized list
6. **Competitor Analysis**

    a. Compare 2–3 apps
    b. Output: Comparison

Hard

7. **Build MVP with Dev**
    a. Coordinate with developer
    b. Output: Working feature
8. **User Feedback Loop**
    a. Collect + improve
    b. Output: Iteration report
9. **Product Roadmap**
    a. 3–6 month plan
    b. Output: Roadmap

Career 12: Web Developer

Beginner

1. **Learn HTML + CSS**
    a. Build simple webpage
    b. Output: Static site
2. **Understand Responsive Design**
    a. Mobile-friendly layout
    b. Output: Responsive page

Intermediate

3. **Learn JavaScript Basics**
    a. DOM manipulation
    b. Output: Interactive page
4. **Build Portfolio Website**
    a. Personal site
    b. Output: Live site

5. **Learn Backend Basics**
    a. Node.js or Flask
    b. Output: Simple server
6. **Connect Frontend + Backend**
    a. Form submission
    b. Output: Working feature

Hard

7. **Full Stack App**
    a. Auth + database
    b. Output: Project
8. **Deploy App**
    a. Vercel / Render
    b. Output: Live link
9. **Optimize + Secure**
    a. Speed + basic security
    b. Output: Improvements

Career 13: Game Developer

Beginner

1. **Learn Game Engine Basics**
    a. Unity / Unreal
    b. Output: Simple scene
2. **Create Basic Game**
    a. Example: Flappy Bird clone
    b. Output: Playable game

Intermediate

3. **Add Game Mechanics**
    a. Score, physics

    b. Output: Improved game
4. **Learn C# or C++ Basics**
    a. Scripting
    b. Output: Code examples
5. **UI for Game**
    a. Menu, buttons
    b. Output: UI system
6. **Sound Integration**
    a. Effects + music
    b. Output: Audio added

Hard

7. **Complete Game Project**
    a. Multi-level
    b. Output: Full game
8. **Publish Game**
    a. Play Store / itch.io
    b. Output: Live game
9. **Optimize Performance**
    a. Reduce lag
    b. Output: Metrics

Career 14: Freelancer (General Skills)

Beginner

1. **Pick a Skill**
    a. Design, writing, coding
    b. Output: Final skill
2. **Create Profile**
    a. Fiverr / Upwork
    b. Output: Profile

Intermediate

3. **Create Portfolio**
    a. 3–5 projects
    b. Output: Portfolio
4. **Write Gig Description**
    a. Clear offering
    b. Output: Gig
5. **Client Communication Practice**
    a. Simulate chat
    b. Output: Script
6. **First Outreach**
    a. Contact 10 clients
    b. Output: Messages sent

Hard

7. **Get First Paid Client**
    a. Even small amount
    b. Output: Proof
8. **Deliver High Quality Work**
    a. Meet deadline
    b. Output: Client feedback
9. **Scale to ₹10K/month**
    a. Repeat process
    b. Output: Income proof

Career 15: Teacher / Educator (Modern + Online)

Beginner

1. **Choose Subject**
    a. Math, Science, etc.
    b. Output: Selected subject
2. **Explain One Topic Simply**

    a. Record or write
    b. Output: Explanation

Intermediate

3. **Create Lesson Plan**
    a. Structured teaching
    b. Output: Plan
4. **Make Educational Content**
    a. Video or notes
    b. Output: Content
5. **Engage Students**
    a. Ask questions
    b. Output: Interaction plan
6. **Test Students**
    a. Quiz or assignment
    b. Output: Test

Hard

7. **Teach Live Session**
    a. 3–5 students
    b. Output: Recording
8. **Improve Based on Feedback**
    a. Adjust teaching
    b. Output: Changes
9. **Build Course**
    a. Full structured course
    b. Output: Course

Career 16: Mobile App Developer

Beginner

1. **Understand App Basics**

    a. Native vs Cross-platform (Flutter, React Native)
    b. Output: Notes
2. **Build Simple App UI**
    a. Create 2–3 screens (login, home)
    b. Output: App UI

Intermediate

3. **Add Navigation**
    a. Move between screens
    b. Output: Working navigation
4. **Use APIs**
    a. Fetch data from public API
    b. Output: Data displayed
5. **State Management Basics**
    a. Manage app data
    b. Output: Working feature
6. **Debug App Issues**
    a. Fix UI or logic bugs
    b. Output: Fixed app

Hard

7. **Full App Project**
    a. Auth + database
    b. Output: Working app
8. **Deploy APK / App**
    a. Installable file
    b. Output: APK
9. **Optimize Performance**
    a. Smooth UI
    b. Output: Improved app

Career 17: Cloud Engineer

Beginner

1. **Understand Cloud Basics**
    a. AWS, Azure, GCP
    b. Output: Notes
2. **Deploy Static Website**
    a. Use free hosting
    b. Output: Live site

Intermediate

3. **Learn Virtual Machines**
    a. Launch VM
    b. Output: Running instance
4. **Storage Services**
    a. Use cloud storage
    b. Output: Upload/download demo
5. **Basic Networking**
    a. IP, firewall rules
    b. Output: Config setup
6. **Monitor Usage**
    a. CPU, memory
    b. Output: Report

Hard

7. **Deploy Backend on Cloud**
    a. Host API
    b. Output: Live API
8. **CI/CD Pipeline**
    a. Automate deployment
    b. Output: Pipeline
9. **Secure Cloud Setup**

    a. IAM roles, permissions
    b. Output: Secure config

🧪 Career 18: QA Tester / Software Tester

🟢 Beginner

1. **Understand Testing Types**
    a. Manual vs Automation
    b. Output: Notes
2. **Test a Simple Website**
    a. Find bugs
    b. Output: Bug list

🟡 Intermediate

3. **Write Test Cases**
    a. Define scenarios
    b. Output: Test document
4. **Use Testing Tools**
    a. Selenium basics
    b. Output: Script
5. **Report Bugs Properly**
    a. Steps, expected vs actual
    b. Output: Bug report
6. **Regression Testing**
    a. Re-test features
    b. Output: Results

🔴 Hard

7. **Automate Test Suite**
    a. Multiple test cases
    b. Output: Scripts

8. **CI Integration**
    a. Run tests automatically
    b. Output: Setup
9. **Performance Testing**
    a. Load testing
    b. Output: Report

🎯 Career 19: Sales & Business Development

🟢 Beginner

1. **Understand Sales Basics**
    a. Leads, conversion
    b. Output: Notes
2. **Pitch a Simple Product**
    a. Practice speaking
    b. Output: Pitch script

🟢 Intermediate

3. **Cold Outreach**
    a. Contact 10 people
    b. Output: Messages
4. **Handle Objections**
    a. Prepare responses
    b. Output: Script
5. **CRM Basics**
    a. Track leads
    b. Output: Sheet
6. **Closing Techniques**
    a. Learn persuasion
    b. Output: Notes

Hard

7. **Close a Real Deal**
    a. Sell something
    b. Output: Proof
8. **Improve Conversion Rate**
    a. Analyze results
    b. Output: Data
9. **Build Sales Funnel**
    a. End-to-end system
    b. Output: Funnel

✍️ Career 20: Technical Writer

Beginner

1. **Write Simple Guide**
    a. Explain topic (e.g., “What is API”)
    b. Output: Article
2. **Learn Documentation Style**
    a. Clear, structured writing
    b. Output: Notes

Intermediate

3. **Write How-To Tutorial**
    a. Step-by-step guide
    b. Output: Tutorial
4. **Create README for Project**
    a. Explain usage
    b. Output: README
5. **Edit & Improve Content**
    a. Fix clarity
    b. Output: Improved doc
6. **Use Markdown**

    a. Format properly
    b. Output: Markdown doc

Hard

7. **Full Documentation Project**
    a. Complete guide
    b. Output: Docs
8. **Write API Documentation**
    a. Endpoints, usage
    b. Output: API doc
9. **Publish Blog / Docs Site**
    a. Online documentation
    b. Output: Live site
